The wireframe shows a mobile application interface. At the top is a status bar with a black background, displaying a white Wi-Fi icon, a cellular signal icon, a battery icon, and the time 12:30. Below this is a grey header bar containing a magnifying glass icon, the text 'San Francisco', a calendar icon, and the date range '10/01 - 10/03'. The main content area has a white background. It starts with a section titled 'Account Settings' preceded by a person icon. This section contains three input fields: 'Name', 'Email', and 'Current Password'. The 'Current Password' field is followed by a 'New Password' field. Below the 'Account Settings' section is a 'Payments' section, which is a modal or drawer view indicated by a close button (an 'x' in a circle) in the top right corner. The 'Payments' section has a card icon in the top left and contains four input fields: 'Card Number', 'MM/YY', 'CVV', and 'Zip Code'. Below the 'Payments' section is a large, dark grey button labeled 'Save Changes'. At the bottom of the screen is a navigation bar with a black background. It contains four icons with labels: a heart icon for 'Favorites', a speech bubble icon for 'Reviews', a list icon for 'Reservations', and a person icon for 'Settings'. At the very bottom is a black Android-style navigation bar with three white icons: a back arrow, a circle, and a square.
